

2d Medical Battalion Policy Statement Command Philosophy

"Nos Pugna Pro Vita" ... we fight for life

We are charged with providing Role I and Role II Health Service Support (HSS) to experts in the profession of arms within 2d Marine Logistics Group (MLG) and II Marine Expeditionary Force (MEF) so that they may continue to fight and win against our Nation's adversaries.

As a task-organized battalion, we must stand ready to deploy forces in support of Fleet Marine Force operations in every clime and place and to perform under extreme adversity in the face of transition to crisis/conflict and up to large-scale combat operations.

To answer this future call to action and succeed in our mission, we will rely on our training, skills, and the courage of **every 2nd Medical Battalion Sailor and Marine to execute the following:**

1. **Maintain our character, integrity, and be above reproach**
 - ❖ We will set the example through our military bearing, good conduct on and off duty, adherence to core values, and the fair treatment of others with dignity and respect
2. **Maintain our commitment, discipline, and pride in our actions and professionalism**
 - ❖ We will have personal job accomplishment and initiative by always striving for excellence in all that we do, as well as encourage, support, and motivate each other as one team, to do our best to achieve the mission
3. **Continuous professional and personal readiness**
 - ❖ We will be committed to our professional and personal growth by continuing to hone our skills and expand our professional knowledge and education, as well as increase our qualifications, competency and proficiency
4. **Continuous culture of learning**
 - ❖ We will be a Battalion that can self-assess, self-correct, and innovate through process improvements and efficiencies
5. **Maintain the respect and trust of those we support**
 - ❖ As you put your trust in me as your Commanding Officer, I trust you to be morally, mentally, and physically committed to the Battalion's success in achieving the mission while being safety conscious

It is truly my honor and privilege to serve you as your Commanding Officer. As we have been entrusted with the medical care of 2d MLG and II MEF Marines and Sailors, I have faith and confidence in each one of your abilities and the standard of excellence in all we do.

A. TOLER

**Captain, U.S. Navy
Commanding Officer, 2d Medical Battalion, 2d MLG**
